

To Whom iIt May Concern,In this day and age of too much, useless information XM satelite radio is a pleasure and a joy. It has literally changed the listening experience of radio. I find it's programming to be creative and smart, with countless options for all who listen. As a resident of New York City, the day they started broadcasting traffic was the day my commute became much, much easier. They are not swayed by advertising influences or demographichs such as the average am/fm stations. (i find these stations focus their traffic reports on the typical heavy commuter areas only during certain times of the day. Their broadcasts of traffic and weather are peppered with plugs and endorsments. Not interested!)

As a willing consumer of this product and service, i urge you in the name of CAPITOLISM, FREEDOM OF SPEECH, AND FREE ENTERPRISE not to revoke this wonderful service.

Sincerely,

Catherine Canino

P.S. It is my firm belief that within 10 years or less XM satelite radio will be as ubiquitous as the cell phone. That is the degree to which it has changed my life.
